30 JAN 1962

MEMORANDUM FOR : Deputy Director (Plans)
THROUGH : Acting Chief, Development Projects Division, DD/P
SUBJECT : Meeting with [] 25X1A

25X1A

1. I met with [] last evening to hear a report on his discussion with Kelly last week and on East Hartford and Palm Beach activity. Perry made the following points:

a. The senior production people at East Hartford are screening all important J-58 parts to determine which parts could be committed to limited production now and to accelerate initial production of parts yet to be proven. This was in response to a concern I voiced to him some time ago regarding adequate flight test engines fully rated as soon as possible.

b. The single engine emergency operation can be solved by a manual emergency overspeed control permitting higher thrust at the expense of engine life.

25X1A c. The meeting between the Director of Central Intelligence, yourself, and [] has had extremely good results.

2. In connection with this last point a similar session with Kelly might stimulate him to further effort towards bettering his delivery schedule. So far as I know the bad news regarding aircraft delivery did not come out until after their meeting on the West Coast.
